Geospatial resourcing that delivers

Due to 20 years' worth of experience, Triad's Geographic Information Systems (GIS) team has a unique ability to fill these specialist roles from our unrivalled network of candidates.

Not only can we bring you properly vetted and qualified candidates quickly, our track record of ensuring a hire is successful and your chosen candidate arrives on Day 1 is second to none.

Because we get to know your business, and ensure that there is transparency throughout the entire process, we define best practice and consistently exceed client expectations.

- Across all sectors, Triad is the UK's market leader in contract and permanent GIS resourcing

- Our clients range from global giants recognised as industry leaders to new GIS start-ups

- We have a responsive and experienced team with unparallel resourcing and geospatial experience

- Our extensive candidate network includes exclusive relationships, cultivated over several decades

- Our onboarding process is managed entirely in-house using Agile best practice to ensure clients and candidates are up and running smoothly as quickly as possible.

Together, this means that you will find it easier, quicker and more effective to use Triad to resource your GIS roles.

The complete GIS skillset

Whether it is advice and guidance, project and product delivery, or additional capacity and expertise, Triad can find the right people to deliver your geospatial technology requirements.

As a standalone specialist in the industry, we always source the highest calibre of candidates from Graduates to Business Leaders.

Triad is able to source candidates with geospatial competencies including:

- Map production, cartography, and digitisation

- Desk and field-based data capture

- Survey

- Remote Sensing, Photogrammetry and LiDAR

- Location Intelligence

- Automation

- Analytics, data and data science

- App, web and software development

- Management – team, project, programme

- Architecture

- Pre sales and Business Development

- Consulting, advisory

Customer trust us with their GIS needs

Triad spent the time to listen and understand our unique challenges, and only brought the top appropriate candidates forward. Experience, personality, skill set and drive were all evaluated, resulting in a very high success rate.

We've hired senior management, sales, support, programming and development resources extremely successfully with Triad.'

Director of Operations, **Leading GIS technology company**

triad

The best GIS resourcing partner

Putting our clients' needs first

Triad has an impressive track record of providing GIS resources that make our clients more competitive in their field.

Each assignment gives us the opportunity to enrich the geospatial skills of our clients and their teams and that's something we are passionate about.

We have mastered the art of thinking big and acting fast, focusing our clients on early and continuous ROI.
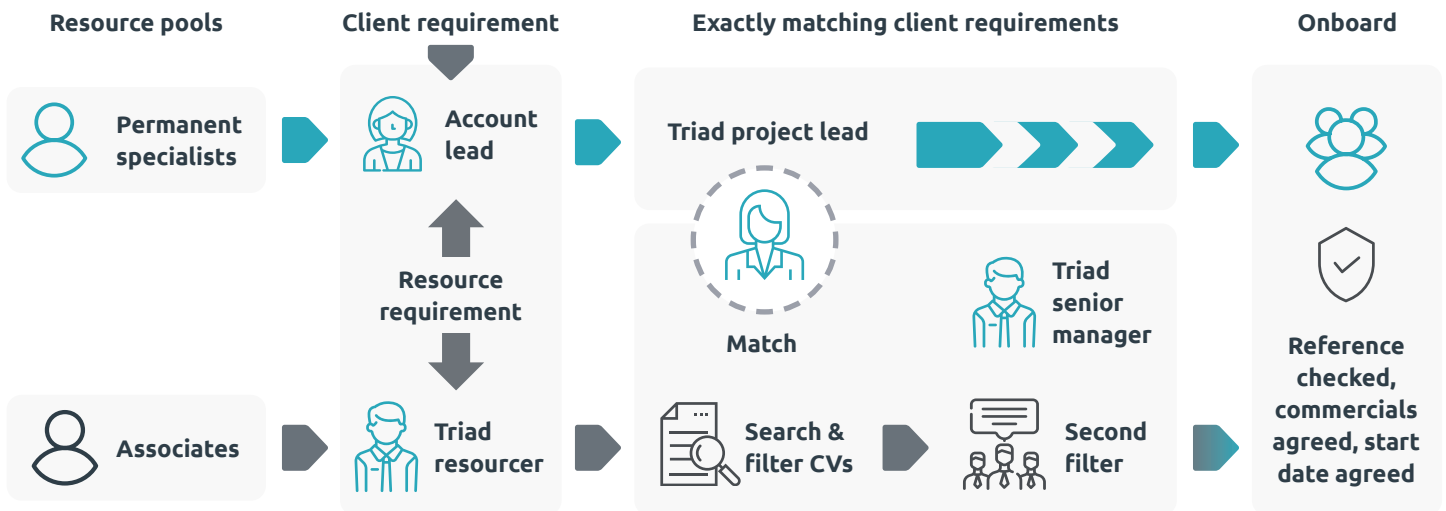

Our in-house delivery team's onboarding and vetting process delivers the best experience possible for both clients and candidates.

Technology agnostic

Triad has experience of supplying candidates with a wide range of technology experience including;

- ESRI ArcGIS
- MapInfo
- FME
- QGIS
- Smallworld
- Geomedia
- Geoserver

- Geocortex
- PostGIS
- PostgreSQL
- Cadcorp
- AutoCAD
- Microstation
- ERDAS

- ENVI
- Python
- Javascript
- Net
- C++
- Java
- And more...

A success focused approach to resourcing

Resource pools — Permanent specialists / Associates

Client requirement — Account lead / Resource requirement / Triad resourcer

Exactly matching client requirements — Triad project lead / Match / Triad senior manager / Search & filter CVs / Second filter

Onboard — Reference checked, commercials agreed, start date agreed

'Alongside ensuring they understand our business, Triad's expertise and extensive network within the geospatial industry has enabled them to provide the best resources to fit us. They have helped us scale up at short notice across our engineering and geospatial teams, keeping critical projects on track.'
