## About Triad

# Digital Solutions...

For 30 years, Triad has been honing its expertise in technology-based business change. This experience gives our clients the confidence to invest in our services, knowing that we will deliver the desired outcome.

**You shouldn't have to wait months or years to see working software!**

We are experts at delivering working software in incremental releases to enable quick learning and rapid realisation of benefits.

# Defined, Designed, Delivered

At Triad, we work alongside you to understand your business and the technology challenges you face. 30 years' experience in the toughest of environments helps us identify with you the right solutions for your business.

Triad brings the skills, commitment and people to achieve digital transformation within your budget and timescales.

**A track record of success that spans the public, private and third sectors.**

**A consultative style producing a partnership and teamwork approach that ensures your needs are met and projects are a success.**

**A reputation for expertise, and flexibility, with an unbroken track record of successful delivery across Agile and waterfall projects.**

Whether it's about reducing cost, improving service or introducing innovation, Triad has an impressive track record in making our clients more competitive in their field. Each assignment gives us the opportunity to enrich the digital skills of our clients and their teams – and that's something we are passionate about. We have mastered the art of thinking big and acting fast, focusing our clients on early and continuous ROI.

**So, if you need a project team to achieve your digital goals, look no further than Triad.**

# Services

## Triad's range of services spans the spectrum of ICT disciplines.

Whether it's advice and guidance, project and product delivery, or additional capacity and expertise our 30 years of experience mean that we can find the right people to deliver your technology requirements.

### Consulting and advisory

Designed to discover insight, develop direction, and deliver certainty.

### Staffing, resourcing and recruitment

Finding you the best digital talent is in our DNA. Our unique business model enables us to provide you with the most appropriate resources from our permanent, associate and contractor pools.

### Software development and engineering

We understand what it takes to turn code into product and our engineers build software that works, and works well.

### Programme delivery and support

When it comes to getting projects over the finishing line we can't be beaten. Our 30 year heritage has helped us understand how to deliver projects and programmes on time and within budget, without compromising on business benefit. Increasingly support, operations and maintenance are built out from within the development cycle.

Our consulting and advisory services are designed to discover insight, develop direction, and deliver certainty. We build robust working software in a way that enables rapid, incremental enhancement – vital to organisations that need to react fast. Plus, we understand what it takes to turn code into product. When it comes to getting projects over the finishing line we can't be beaten.

**Finding you the best digital talent is in our DNA.**

# Clients

Ministry  
of Justice

## Ministry of Justice

Supported a major transformation programme to share information more effectively including the development of the Digital Markup Service (DMU). Triad provided Agile coaching plus product development, platform engineering activities, service design and management, and a provision of a dedicated business analysis service.

## Santander

Tier 1 supplier providing over 200 plus staff across the spectrum of IT operations and support disciplines, including management roles.

**“Working with Triad was a great decision.  
They delivered results rapidly and  
effectively.”**

- Gareth Lloyd | CIO, Companies House

## Highways England

Supported move to next generation systems and Cloud Services. Triad led design assurance of all core IT solution designs across all delivery projects. Software-as-a-Service (SaaS), Platform-as-a-Service (PaaS) and Infrastructure-as-a-Service (IaaS) solutions.

# Technologies

Clients know they can come to Triad for help choosing the right technologies to solve their business problem and for access to experts across the vast universe of different technology products.

## Software

Our developers and engineers utilise leading industry best practices, including open source and Microsoft products, to create amazing digital services.

## Collaboration

Triad can advise and coach your organisation in the usage and adoption of the world's leading collaboration tools, helping you to deliver consistent digital results.

## Blockchain

Triad can demonstrate whether Blockchain is right for your business and will help you understand the associated challenges.

## Office 365

We help our clients leverage their investment in Office 365 by rapidly building applications and services that integrate seamlessly and offer a highly intuitive user experience.

## GIS/Geospatial

Triad has developed an intimate knowledge of the GIS marketplace: we understand our clients' GIS needs at all levels.

## Agile

Triad consultants have utilised the Agile approach to software development and technology project delivery countless times to speed up delivery and increase quality.

## Cloud

Whether it's option evaluation, physical migration or overseeing a third party, Triad consultants will develop a surefooted plan to help clients reduce costs, improve responsiveness and enable digital transformation.

## Intelligent Automation

Our dedicated team of specialists have experience identifying the right processes to automate and ensuring that ROI follows.

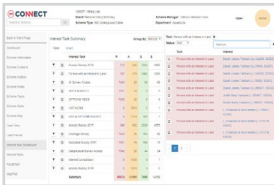

## CASE STUDY

# Dalcour Maclaren CONNECT project

Triad helped Dalcour Maclaren move to Agile development during the design and delivery of its first combined client scheme and document management system, complete with integrated geospatial functionality.

Triad helped Dalcour Maclaren achieve its self-service goals, cloud migration and reporting functionality, which have **significantly increased customer satisfaction** while reducing Scheme timings to the **financial benefit** of both Dalcour Maclaren and its clients.

**“The redevelopment of our Scheme management database was incredibly important. Working with Triad enabled us to convert and improve many of our aspirations into easy to use process management tools that created a competitive advantage from day one.”**

**- Andrew Roberts** | Project Sponsor, Dalcour Maclaren

Triad have delivered, with Dalcour Maclaren’s in-house team, a clear competitive advantage based on innovative architecture with cloud-based elements offering inherent flexibility and cost efficiencies to support future growth.
